

MENARD BACHY

Health & Safety

We will create and maintain a workplace that is free from hazards which may affect people at work.

We have established objectives to:

- Maintain Health & Safety of all through all our activities
- Actively identify Legislative and Regulatory compliance
- Using appropriate standards with our own continual improvement
- Rehabilitation and Return to Work Management
- Communication across all of the people involved in our processes

In order to achieve these objectives, we will:

- Identification of Health & Safety specific responsibilities and accountabilities within our Position Descriptions and compliance with those Responsibilities.
- Developing and maintaining Consultation and Communications strategies for Health & Safety.
- Identifying, assessing and controlling hazards within prescribed Hierarchy of Controls and Residual Risk Evaluation within the guidelines developed in AS 4360 Risk Management as they apply to our corporate Policies/Process Controls.
- Contractor and Supplier Management as related to our processes.
- Rehabilitation as a means to promote wellbeing and maintaining the self-esteem of the individual, whilst returning any injured person to meaningful work as soon as is practicable after any incident.
